Certified HPE Genuine Replacement Parts

Not every replacement part is equal

One of the biggest misconceptions when buying replacement parts is that it is assumed that the quality levels from different sources match. In reality, replacement parts from nonauthorized sources may not have been correctly stored or fully tested or may not be supplied with the most current firmware. All of these factors can result in your system not working correctly, greater downtime, or a shorter life span of the parts, which is time, resources, and money wasted.

REPLACEMENT PARTS—AN IMPORTANT PART OF YOUR IT LIFECYCLE

Whether you have invested in hybrid cloud, the edge, or an alternative IT approach, you need to maximize the availability of your infrastructure while keeping costs under control. Selecting genuine, reliable, high quality, compatible replacement parts can help maintain your system performance and uptime as well as reducing your repairs-related labor costs.

By choosing Certified HPE Genuine Replacement Parts, you can be confident that your parts have the quality, integrity, and compatibility required to help keep your systems up and running.

1. Certified HPE Genuine Replacement Parts are qualified under one of the most rigorous testing standards in the industry.
2. Hewlett Packard Enterprise applies compatibility testing, revision updates, and quality management to every part that flows through our supply chain.
3. HPE uses the highest quality components and assembly processes to provide trouble-free usage.

If you need more disk capacity or memory, Certified HPE Genuine Replacement Parts can also be used to upgrade your system capacity economically while at the same time, you can be assured that the system will operate to the defined and required performance and quality levels.

When you purchase Certified HPE Genuine Replacement Parts, you are buying the quality and proven reliability that HPE provides. Certified HPE Genuine Replacement Parts offer outstanding value, exceptional quality, secure and audited origin, and industry-recognized HPE support and warranty.

YOUR TRUSTED PARTNERS

Certified HPE Genuine Replacement Parts can be obtained directly from HPE or from our authorized HPE Replacement Parts partners.

You will have a wide choice from a portfolio, which is proactively planned with consistent availability throughout the parts' support lifecycle.

When you buy from an HPE Replacement Parts partner, you can be confident that you are purchasing only Certified HPE Genuine Replacement Parts.

Be safe in knowing that the HPE parts purchased through an authorized channel, that are installed in HPE product, will not affect the product warranty.
