Hewlett Packard Enterprise

Solution overview

HPE RENEW

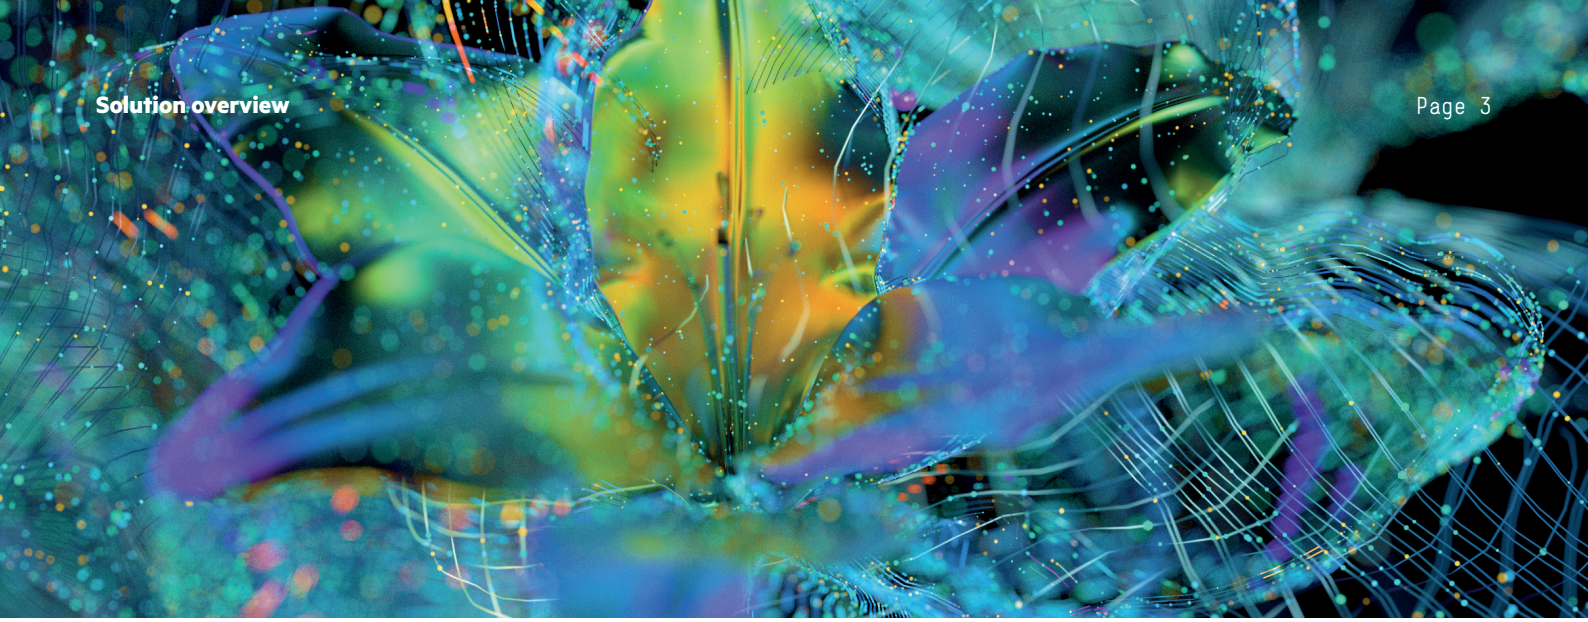
Affordable, remanufactured products, that are as good as new

HPE RENEW

Same great performance, same reliable quality, same warranty as new Hewlett Packard Enterprise products.

Operational flexibility is vital in the ever-evolving world of IT. HPE Renew allows you to develop your IT infrastructure at your own pace without impacting efficiency.

HPE Renew offers a comprehensive range of quality HPE remanufactured products from the latest technology to older generation products, allowing for simple integration and convergence of equipment into your current IT environment – without having to go too deep into your budget. All HPE Renew products are covered by the original HPE warranty, service and support options.



HPE Renew is a worldwide programme that started in 1981, boasting a track record of 40 years longevity and credibility in satisfying customers' needs. Products are sourced from the HPE Demo pool, factory loaner equipment, factory excess, customer returns and trade-ins.

HPE RENEW: COMMITTED TO THE PAST, PRESENT AND FUTURE

Over 80 per cent of the HPE Renew product range is less than 12 months old, product solutions using the latest technology. At the same time, HPE Renew is the single source within Hewlett Packard Enterprise to sell products which are no longer available as new, known as Extended Life Products.

HPE Renew can deliver on a wide range of IT needs now and into the future.

WHAT IS THE DIFFERENCE BETWEEN HPE RENEW REMANUFACTURED PRODUCTS AND OTHER REFURBISHED PRODUCTS?

The distinction between HPE Renew remanufactured products and other sources of refurbished or used equipment not purchased from HPE or HPE Certified Resellers is not always obvious.

HPE Renew remanufactured products are fully backed by HPE warranty and have been remanufactured to be equivalent to new product standards. They carry the same warranty and service options as new Hewlett Packard Enterprise products.

Since HPE Renew manages stock worldwide, we can procure for you products from overseas warehouses if they are not stocked locally.

On the other hand, refurbished or used equipment not purchased from HPE or HPE Certified Resellers may not be fully tested or certified to meet like-new standards. These products may not be backed by the full manufacturer's warranty.

HPE RENEW IS FOR YOU

You have a tight IT budget but still want HPE quality? HPE Renew delivers a high-performance, low-cost solution when price really counts. HPE Renew products are at least 15 per cent below the price of new. Look out for special promotions and you can save even more.

In this fast-paced technology environment HPE Renew allows you to defy time and maintain your existing IT infrastructure, while adding upgrades and expanding to the next generation – at your own pace.

All HPE Renew products have undergone comprehensive HPE remanufacturing and testing processes, ensuring they are fully restored to meet HPE certified standards. Software, licences, service and support options for HPE Renew products are equivalent to those offered with new HPE products. The products are also loaded with the latest software and firmware revisions.

HPE RENEW – AS GOOD AS NEW

- Excellent price/performance ratio
- Same-as-new HPE warranty, service and support options
- Broad range of HPE Solutions
- Certified HPE quality with original software and licences
- Freedom to migrate to new technologies at your own pace
