Purchase Order Program (POP) Financing with DLL

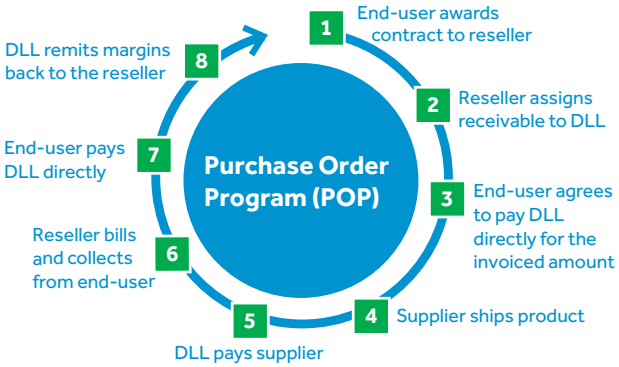
Finance large contracts while focusing on day-to-day business

DLL's POP enables dealers to secure large orders from federal, state, and local governments, educational institutions, and Fortune 500 companies.

Resellers can take on large contracts that exceed their standard DLL credit facility. Completed on a PO or contract basis, the dealer will assign the receivable to DLL and the reseller pays DLL directly.

Resellers must already have a DLL credit facility. DLL is already in the federal government's payable system, simplifying the repayment process.

How POP works:



Benefits:

- **Secure** above average or large transactions
- **Accelerate** business growth
- **Focus** on day-to-day business and operations
